WebBlaze

SEO CASE STUDY · BEVERLY HILLS PLASTIC SURGERY

From buried in Google to page one for thousands of patient searches.

How we rebuilt Dr. Michael K. Newman's website and search presence, and what it did for traffic, visibility and new patient consultation requests in six months.

12x
more visitors from Google each month (110 to 1,401)

5,625
searches where the practice now shows on page one, up from 202

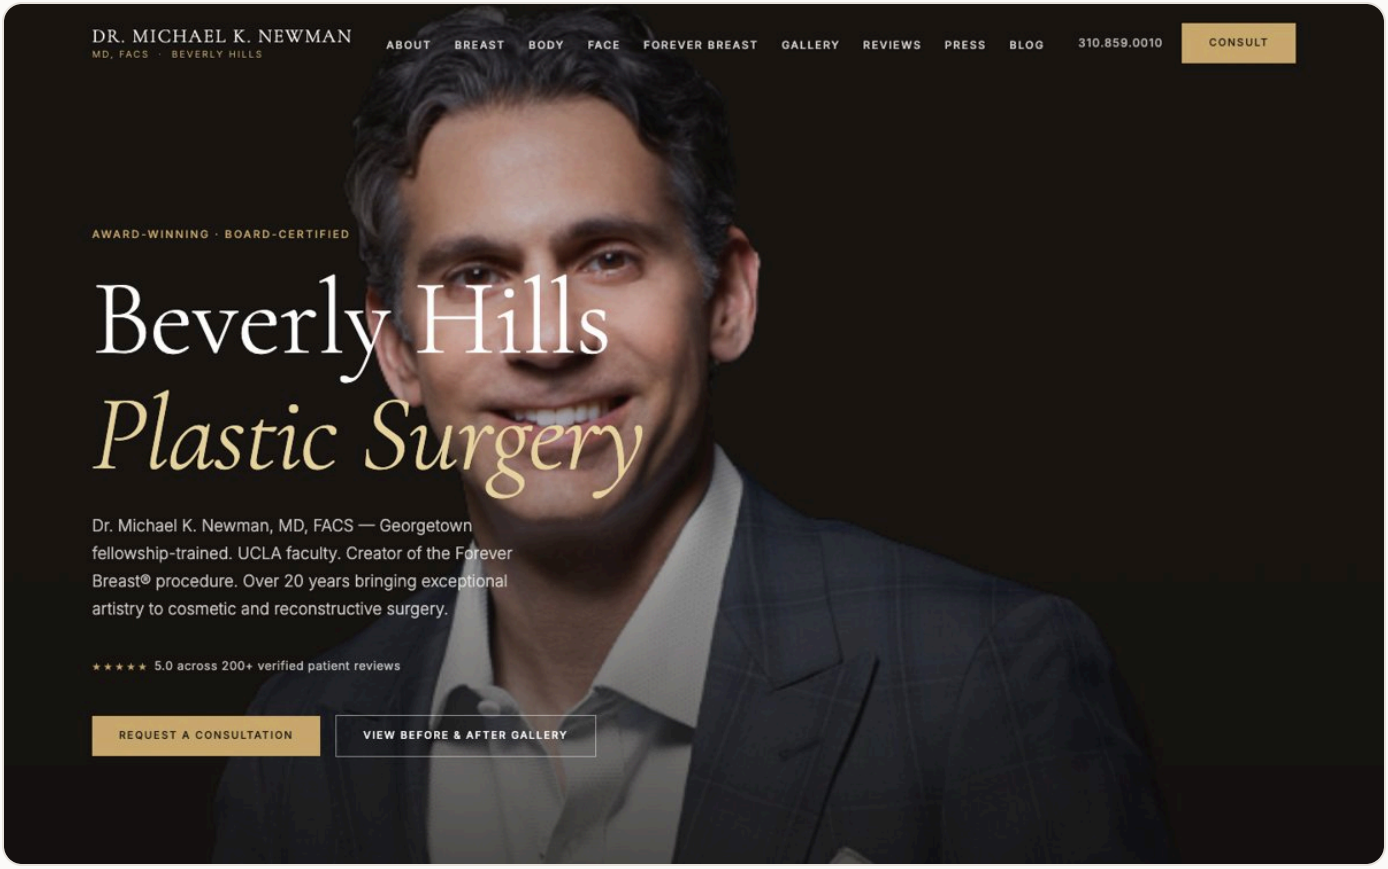

22
consultation requests from real patients since July

Data: Google Search Console and Google Analytics, through November 4, 2026

THE CLIENT

A top surgeon whose website wasn’t bringing in patients.

Dr. Michael K. Newman is a board-certified plastic surgeon in Beverly Hills with more than 20 years in practice. Beverly Hills is one of the most crowded markets for cosmetic surgery anywhere, and his old website was barely being found.

Before

About 110 visitors a month from Google. The site showed up for 607 searches, and patients had no easy way to reach out from the content they read.

What we did

Rebuilt the site, published 159 expert articles answering the questions patients actually search, and put a consultation form on every one.

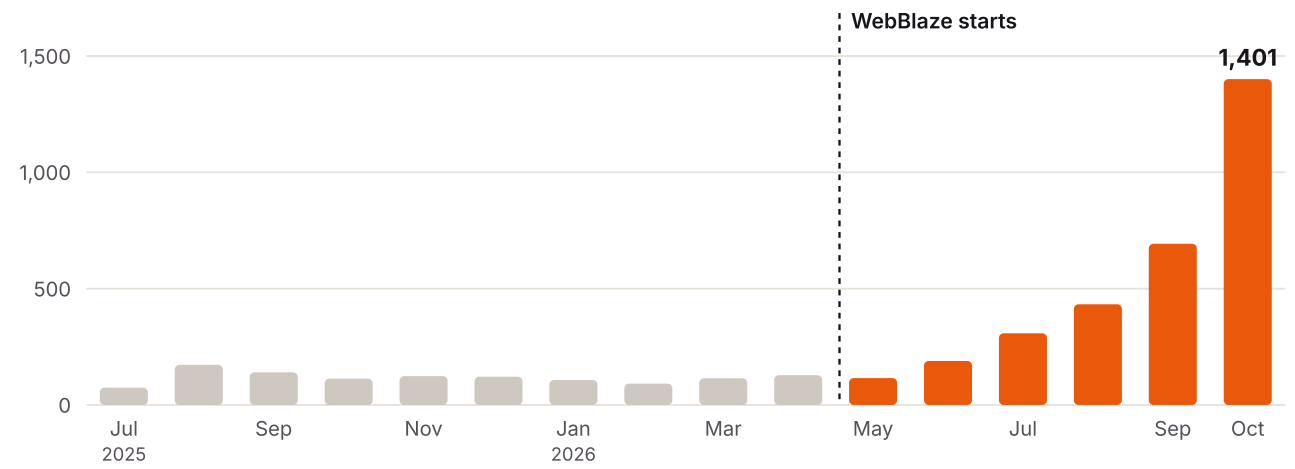

After

1,401 Google visitors in Oct 2026, page-one rankings for 5,625 searches, and a steady flow of consultation requests.

TRAFFIC

Google visitors grew 12x.

Clicks to the site from Google search, by month. Grey is before we started; orange is after.

Source: Google Search Console, clicks per month. Baseline is the Jan 2026 to Apr 2026 average.

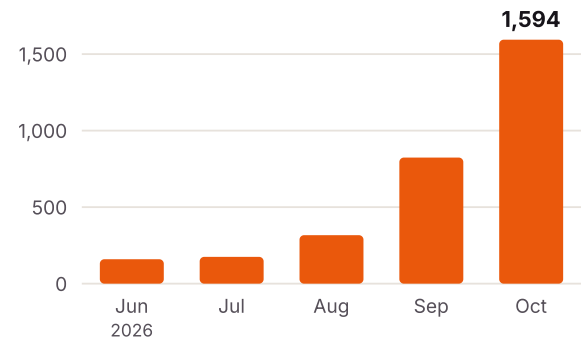

110
Google visitors per month before (Jan 2026 to Apr 2026 avg)

1,401
Google visitors in Oct 2026

33x
more times the site was shown in Google results

2m 23s
average visit length from Google in Oct

Visits from organic search

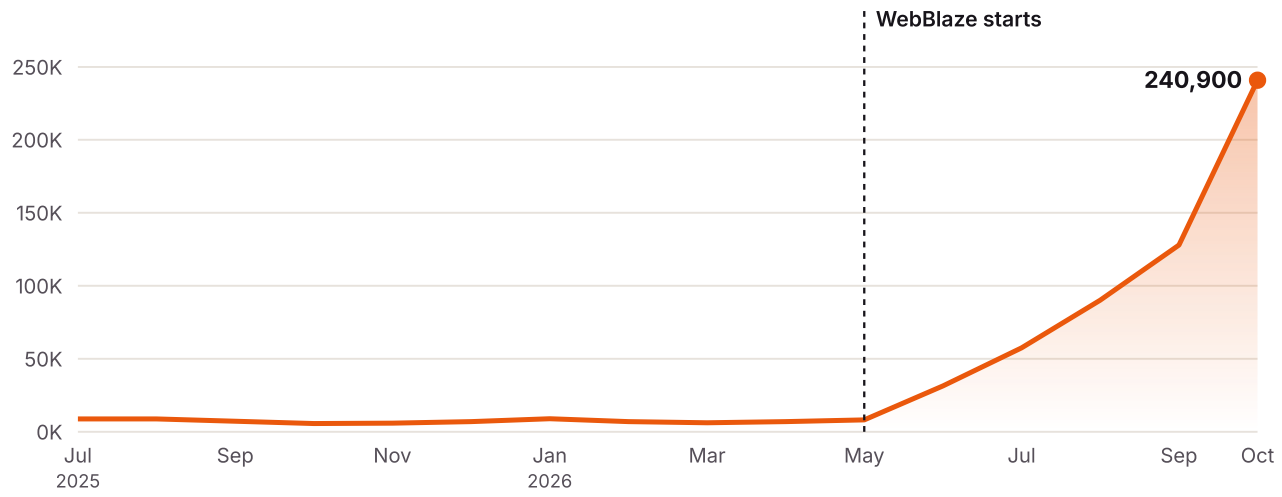

Source: Google Analytics 4, organic search sessions.

> The growth keeps building. Every article we publish keeps working for the practice months later, so each month starts from a higher floor than the last. **This is traffic the practice owns. It doesn't stop when an ad budget runs out.**

VISIBILITY

Seen 33x more often on Google.

How many times Google showed the site in search results each month.

Source: Google Search Console, impressions per month.

	MAY 2026 (MONTH WE STARTED)	OCT 2026	GROWTH
Searches the site shows up for	607	8,748	14x
Searches ranking on page one	202	5,625	27x
Searches ranking in the top 3	75	1,363	18x
Pages appearing in Google	40	174	4x

Source: Google Search Console. A search counts once per month, ranked by its average position.

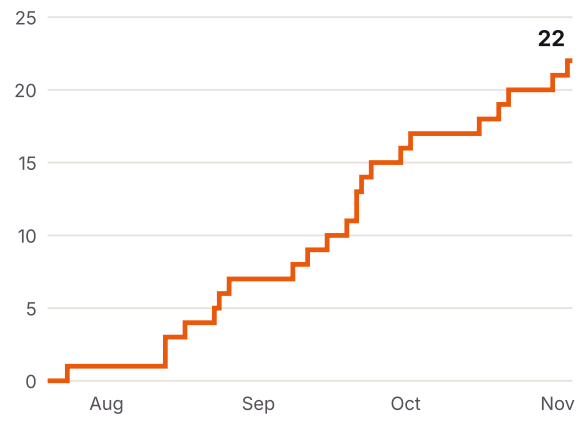

> Average position across all searches improved from **18** to **9.8**, which means the typical search now finds the practice on page one.

CONVERSIONS

Traffic that turns into patients.

Visitors don't pay the bills. Consultation requests do. Every request below is a real person asking about a procedure. We screened out our own tests, spam bots and vendors selling to the practice before counting.

Consultation requests, running total

Real patient requests through the website, since form tracking began July 2026.

What patients asked about

Breast	11
Face & Neck	6
Body	2
Tummy Tuck	2
Mommy Makeover	1

These are high-value procedures, the patients every practice wants more of.

22
real patient consultation requests in about 14 weeks

4
came straight from the form inside an article, before the reader ever left the page

89
visits referred by AI assistants like ChatGPT and Gemini

> We also filter vendor sales pitches out of the form, so **the front desk only sees real patients**, not marketing spam.

RANKINGS

On page one for the searches that bring in money.

A sample of local, high-intent searches where the practice now ranks on Google's first page. Someone typing "beverly hills nose job cost" is close to booking. Over the last 30 days the site ranked on page one for **569** searches that name Beverly Hills or Los Angeles.

SEARCH ON GOOGLE	TIMES SHOWN, LAST 30 DAYS	AVG. POSITION
beverly hills nose job cost	62	#2
lower face lift cost los angeles	55	#3
mini neck lift cost los angeles	34	#3
blepharoplasty cost beverly hills	33	#3
beverly hills radiesse	30	#5
lipo beverly hills	37	#5
benelli breast lift beverly hills	34	#5
best full ablative resurfacing beverly hills	31	#6
breast augmentation cost beverly hills	37	#6
brachioplasty beverly hills	158	#6

Source: Google Search Console, Oct 6 to Nov 4, 2026. Searches for the doctor's own name are excluded.

Articles bringing in the most visitors

ARTICLE	VISITORS (30 DAYS)	TIMES SHOWN
Breast Implant Size Calculator: How to Choose the Right Size	238	13,132
Turkey Neck: What Causes It, and What Actually Fixes It	167	19,339
Axillary Breast Tissue: Why the Armpit Bulge Is Not Always Fat	87	10,909
Neck Lines: What Causes Them and How They Are Treated	85	20,240
Umbilicoplasty: Belly Button Surgery, Shapes and Recovery	73	9,944
Marionette Lines: What Causes Them and What Actually Helps	68	10,192

HOW WE DID IT

The playbook.

No tricks, and nothing that gets a site penalized later. Just the work Google rewards, done every week.

01 A fast, modern website

We rebuilt the site from scratch. It's built mobile-first, easy to read, and has a clear path to book on every page.

02 Content patients actually search for

159 in-depth articles on costs, recovery, candidacy and procedure comparisons, each written around a real search with real demand. Published steadily, week after week.

03 A consultation form on every article

Readers can request a consultation from the page they're reading, without hunting for a contact page.

04 Technical SEO done properly

Structured data on the articles so Google can show FAQs and author details, a clean sitemap and correct redirects so nothing gets lost.

05 Ready for AI search

The site is structured so ChatGPT, Gemini and other AI assistants can read it and recommend it, and they already send visitors.

06 Real tracking and reporting

Search Console and Analytics set up properly, with a weekly report to the client that shows wins in plain English.

YOUR BUSINESS NEXT

Want results like these?

Most local businesses have the same problem Dr. Newman had: great at what they do, invisible to the people searching for them. We fix that with the same playbook, scaled to your market and budget.

1

A search check for your business

We look at where you rank today, what your competitors rank for, and which searches in your area you're missing.

2

A plan built for your market

The exact searches to go after, the pages to build, and what changes on your site first.

3

Work you can see every month

New pages going live, rankings tracked, and a report that shows calls, forms and visitors, not vanity numbers.

12x	33x	5,625	22
more Google visitors a month	more often seen in Google results	searches ranking on page one	real patient consultation requests

Let’s talk about your site.

When you email me, you get me, not a call center or a sales team.

Zayden, WebBlaze **zayden@webblaze.io** **webblaze.io**

All results in this case study come from Dr. Newman's own Google Search Console and Google Analytics accounts, with data through November 4, 2026. Monthly figures use complete calendar months. Results depend on market, competition and starting point.
